

Husqvarna T 4000 Petrol Soff-Cut

Husqvarna T 4000 Petrol Soff-Cut is an advanced petrol dust extractor developed to manage large amounts of dust. The intuitive controls make the dust extractor easy to start and operate. It is equipped with the Jet Pulse Filter cleaning system, which purges the filter with negative air pressure to effortlessly and safely clean the filter. The machine is designed to stay durable even in tough conditions thanks to its corrosion-resistant steel components. The T 4000 Petrol Soff-Cut is specialized for Soff-Cut® applications with an integrated pre-separator which captures up to 90% of the dust before it reaches the pre-filter. The larger wheels on the Soff-Cut version are designed to handle the weight of the machine without creating marks on green concrete.

Motor

Motor/engine manufacturer	Honda
Output power (As rated by the engine/motor manufacturer)	7.6 hp

Dimensions

Product size length	1608 mm
Product size width	733 mm
Product size height	1609 mm
Weight	237 kg

Specifications

Air Flow, CFM	285 cfm
Max. vacuum	3.77 psi
Water lift	104 in

Features for T 4000 Petrol Soff-Cut

Easy and efficient filter cleaning

The Jet Pulse filter cleaning system ensures high continuous airflow thanks to easy and efficient cleaning of the conical main filter without opening the machine.

Easy and intuitive controls

The controls are easy to locate and control. The yellow light warns the user when the clutch is engaged.

Efficient filtration system

The three separate filtering stages result in longer working time between filter cleaning. The dust is filtered through a cyclone chamber, which separates the heaviest parts, up to 95% of the dust, before the washable main filter. The HEPA micro filters are individually tested and certified to capture 99.99% of the remaining silica dust in the respirable fraction ($0.3\mu\text{m}$).

Clean and simple bag change

The Longopac® bag hose system ensures simple changes of the bag without any dust spills.
