

Husqvarna Blastrac 2-20DT

The Blastrac 2-20DT walk-behind shot blasting machine is a professional heavy duty machine. It is equipped with two powerful blast motors and is ideal for large sized surface preparation applications. The Blastrac 2-20DT is equipped with its own height adjusting system for easy transportation. In addition, its drive motor for self-propelled operation helps maintain speed on ramps and inclines. Whether improving traction and skid resistance or prepping for coatings and overlays, the versatile Blastrac 2-20DT strips, cleans and profiles concrete and asphalt, or horizontal steel surfaces in one easy step.

Powerful and compact

With its two powerful blast motors, it creates a consistent blast pattern and surface profile, whilst still being able to fit through a standard door entrance.

Self-propelled for your comfort

The machine is equipped with a drive motor for ease of use. It also improves productivity and promotes a more even and consistent blast pattern and surface profile.

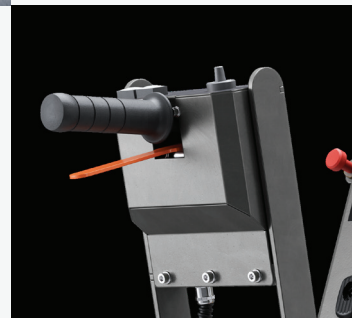

Work virtually dust free

The shot blasting machine has to be connected to a Husqvarna industrial dust collector to create a closed circuit. This means that you are able to work virtually dust free, creating a better working environment.

Ergonomic

This self-propelled shot blasting machine features drive controls on the steering handle.

FEATURES

- Work virtually dust free
- Self-propelled for your comfort
- Powerful and compact
- Ergonomic
- Resource-smart solution
- Durable blast housing
